39. (Currently amended) A system for providing personalized business information to users, the system comprising:

- a computer for creating a profile specifically for the user defining the user's job function;

- a network;

- a server, coupled to the computer and the network, for:

- identifying employer business information requirements for respective user job functions;

creating a profile specifically for a user defining the user's job function and including any professional licenses held by the user and any critical dates; determining personalized business information to provide to the user that is specific to a set of activities that the user was specifically employed to perform based on the created profile and the employer's business information requirements for the user's job function; and

providing the personalized business information to the user, wherein the personalized business information includes at least a first segment of information operable to navigate the user to a second segment of information stored at location remote from the first segment of information.

40. (Previously presented) The system of claim 39, further comprising the server for generating personal training activity data associated with use of provided personalized professional training, the personal training activity data including training progress data and training performance data, wherein the coursework of the personalized training is provided based on the created profile.

41. (Previously presented) The system of claim 40, further comprising the server for recording the training progress data and training performance data.

42. (Previously presented) The system of claim 41, further comprising a database, coupled to the server, for storing the recorded training progress data and training performance data.

43. (Previously presented) The system of claim 42, further comprising the server for

generating documents based on the recorded training progress data and training performance data.

44. (Previously presented) The system of claim 43, further comprising the computer for providing a first set of administrative instructions, and wherein the generating of documents includes the server for generating the documents in accordance with the first set of administrative instructions.

45. (Previously presented) The system of claim 44, further comprising the database for storing the generated documents.

46. (Previously presented) The system of claim 45, wherein the storing includes the computer for providing a second set of administrative instructions.

47. (Previously presented) The system of claim 39, wherein the personalized business information includes knowledge types.

48. (Original) The system of claim 47, further comprising the server for linking the knowledge types to one another.

49. (Original) The system of claim 47, wherein the knowledge types include a descriptive text area.

50. (Previously presented) The system of claim 49, further comprising the server for embedding in at least one of the knowledge type one of: a regulatory links, training links and a compliance link within the descriptive text area.

51. (Previously presented) The system of claim 39, further comprising the server for embedding in the first segment of information an object operable to initiate communication with at least one other user.

52. (Canceled).

53. (Canceled).

54. (Previously presented) The system of claim 39, further comprising the server for providing business information management.

55. (Previously presented) The system of claim 54, wherein the profile is created by the server employing the business information management.

56. (Previously presented) The system of claim 54, wherein the providing of business information management includes providing notification, wherein the notification includes at least one of: a dialog to users communicating updates to compliance knowledge, a dialog to users communicating additional training requirements, a dialog to users communicating upcoming examination, and a dialog to users communicating continuing education

requirements.

57. (Canceled).

58. (Previously presented) The method of claim 1, further comprising generating knowledge use data associated with use of the provided personalized business information.

59. (Previously presented) The method of claim 58, further comprising recording the knowledge use data.

60. (Previously presented) The method of claim 59, further comprising storing the recorded knowledge use data.

61. (Previously presented) The method of claim 60, further comprising generating documents based on the recorded knowledge use data.

62. (Previously presented) The method of claim 1, further comprising providing updated personalized business information based on the amount of personalized business information completed.

63. (Previously presented) The business method of claim 20, further comprising generating knowledge use data associated with use of the provided personalized business information.

64. (Previously presented) The business method of claim 63, further comprising recording the knowledge use data.

65. (Previously presented) The business method of claim 64, further comprising storing the recorded knowledge use data.

66. (Previously presented) The business method of claim 60, further comprising generating documents based on the recorded knowledge use data.

67. (Previously presented) The business method of claim 20, further comprising providing updated personalized business information based on the amount of personalized business information completed.

68. (Previously presented) The system of claim 39, further comprising generating knowledge use data associated with use of the provided personalized business information.

69. (Previously presented) The system of claim 68, further comprising recording the knowledge use data.

70. (Previously presented) The system of claim 69, further comprising storing the recorded knowledge use data.

71. (Previously presented) The system of claim 70, further comprising generating

documents based on the recorded knowledge use data.

72. (Previously presented) The system of claim 39, further comprising the server for providing updated personalized business information based on the amount of personalized business information completed.
